OFFICE 85

Open file

Save

Print

Cut

Copy   Open internet browser

Paste   Open Outlook

Change window   Open explorer

num lock LED
caps lock LED
scroll lock LED
Function key (Fn)

Instructions:

Q-board is a plug and play keyboard device. However, to enable the € sign to work properly, the software settings should be as follows:

- Choose as model / layout: US-International
- Choose as language: US-International

Depending on the operating system / Windows version, these settings can be adjusted using:

- Start/Settings/Control Panel/Keyboard
- Start/Settings/Control Panel/Regional and Language Options

If 'US-International' is not displayed, you might need to use the 'Add' button to select and add this option.

Special keys/Functions:

€	Alt Gr + 5 (If this does not work properly, you may need to adjust the Keyboard and/or Language Settings, as described above)
File Open	To open a file
Save	To save the current file at the current location
Print	To print the current document or the current selection
Cut	To cut the selection (if nothing is selected: no action)
Copy	To copy the selection (if nothing is selected: no action)
Paste	To paste the copied or cut selection (if nothing is copied or cut: no action)
Change Windows	To change between windows (like Alt-Tab)
Open internet browser	Open the Internet browser
Open Outlook	Open Outlook
Open Windows Explorer	Open the Windows Explorer
Scroll Lock	F10 + Fn
Num Lock	F10 (Num lock led will illuminate): Fn + J = 1, Fn + K = 2, Fn + L = 3 etc.
Symbols	Num Lock + Fn + Alt + code Example: Num Lock + Fn + Alt + 'JL7'= ë (using num lock JL7 = 137)
