

A traditional computer mouse makes you use your wrist, shoulder and back to perform something as basic as moving a cursor across your screen or even just clicking. Over time, this can lead to muscle strain or RSI (Repetitive Stress Injuries).

With ProTouch™, you can avoid such problems altogether. Thanks to a unique design and clever functionality, repetitive computer work is now far more forgiving on your wrists, arms, shoulders and back. A central multi-touch unit with tactile keys lets you do more, with less strain.

TECHNOLOGY & FUNCTION

ProTouch™ combines the latest multi-touch technology with tactile keys. With the large, modern multi-touch unit, you can easily control functions such as moving the cursor, scroll, zoom etc. The tactile, silent yet distinctive keys encourage versatility and variety.

ProTouch™ is a modern product without moving parts, making it near immune to typical forms of mechanical wear and tear.

ProTouch™ installs automatically when you connect it to a free USB-port on your computer, via the rugged, included USB cable. It works seamlessly with all OS's, and the Extended

Functionality version is fully compatible with the new application systems in Microsoft Windows 8.

ProTouch™ is as easy to use whether you are right- or left-handed because of the programmable keys and supports multiple screens.

DESIGN

ProTouch™ is designed and developed in Sweden. Both in appearance and accessibility, it is truly top of the line. The aluminum body makes it not only solid and durable, but recyclable to boot. The soft, firm wrist support is made of artificial leather, and ensures relaxing use.

As ProTouch™ contains no mechanical or moving parts, it's very easy to clean or even disinfect.

Sun-Flex® is a corporation with focus on developing, manufacturing and distribution of products for the modern office workplace. With over 20 years of experience and understanding of the modern office workplace, Sun-Flex™ has gained a respected leadership position in the industry.

ERGONOMICALLY SPEAKING

ProTouch™ is a new input device that minimizes the risk of repetitive stress injuries and other problems that can stem from monotonous computer work. Entering information by touching rather than by pressing or pushing, can significantly decrease the physical strain. Based on "scissor key" technology, the ProTouch™ tactile keys are firm, durable and distinct. The placement of the keys allow you to work both ergonomically correct and refreshingly flexible, encouraging you to use all fingers on both hands.

SPECIFICATIONS

- Compatible with Microsoft Windows 98, NT, ME, 2000, XP, Vista, 7, 8 and Apple Mac OS X
- Connectivity: USB, plug & play.
- Material: Aluminum
- Measurements (multi-touch): 105x70mm
- Measurements (product): 450x120x21x(7) mm
- Measurements (packaging, single): 560x190x60mm.
- Weight (net): 700 gram
- Weight (gross): 1600 gram
- Units per shipping box: 10
- Measurements (shipping box): 570x410x330 mm
- Weight (shipping box): 17 kg.
- Art.no (single).
 - 400305: ProTouch™ (GTIN13: 7350042900749)
 - 400306: ProTouch™EF (GTIN13: 7350042900770)
